

DT SERIES DESIGN RESOURCE GUIDE

IMPORTANT CONSIDERATIONS FOR DT SERIES SPECIFICATIONS

YOUR GUIDE TO THE SPECIFICATION AND DESIGN USE OF DURAFORM TEXTURED CABINETS

This guide was created to help designers anticipate various details encountered when specifying Waypoint’s Duraform Textured Cabinets. It illustrates the finished results so you can visualize all the details, manage homeowner expectations and more easily create exactly what you had in mind.

DT SERIES DESIGN CONSIDERATIONS

IMPORTANT CONSIDERATIONS FOR DT SERIES SPECIFICATIONS

- › Door and drawer fronts are the only part of the cabinet that is textured
- › Determine if you are designing to complement the box finish or the textured finish when using end panels
- › Specialty cabinets
 - With Specialty Door cabinets, the matching interior matches the complementary cabinet box
 - Some specialty cabinets are not textured
 - Cabinets with cut outs have more face frame exposure
- › Limited accessories with texture
- › Moldings are limited in the texture finish
 - Moldings are not wrapped completely and cannot be flipped
- › End run/exposed Toe Kicks should be recessed to separate horizontal grain from vertical grain on the cabinet end panel
- › Touchup material matches the complementary box finish

AVAILABLE DT TEXTURES

Relying on today’s latest technologies, these stylish textures have been created for long-lasting and durable use. This range of finishes bonded to composite wood appeal to the designer and homeowner alike with their versatility and ability to create a range of today’s latest styles.

DURAFORM BREEZE
With subtle striations of white and neutral tones, this textured finish makes a beautiful statement. This textured door style sits on a complementary Painted Linen cabinet box and exudes a sense of style and grace and works well for the creation of many unique styles.

DURAFORM DRIFT
With a remarkable likeness to a faded driftwood, this textured door style looks naturally amazing. Placed on a complementary Painted Harbor cabinet box, this textured door with its ridges and grooves captures the look of natural driftwood and can enhance any space in your home.

Duraform Cascade
This rich, deep-textured door style sits on a complementary Maple Espresso cabinet box and creates a dramatic look that will last for years to come. This textured door style with its rich contrast serves as the perfect backdrop for kitchens, baths or any other living space.

SIDE TREATMENT OPTIONS

Plain cabinet side
(1/4" reveal)

Furniture End
(flush side)

WWBEP2534 DT
1" extended pass face frame

BEP34 DT
3/4" Face Frame Edge Exposed

BEP34 DT with DMDB
7/32" Face Frame Edge Exposed

FE with DMDB
7/32" Face Frame Edge Exposed

EXPOSED SIDES

Wall Cabinet with WEP DT

Wall Cabinet with WEP DT & SM8 DT

EXPOSED SIDES

REMEMBER EXPOSED SIDES ARE THE COMPLEMENTARY FINISH.

- › You must determine if you are designing to complement the box finish or the textured finish
- › When adding a 9/64" skin the 3/4" face frame will still be exposed
 - Recommend using SM8 to cover the face
- › When adding a 3/4" end panel the face frame will be covered
 - Remember the 3/4" textured end panels (DT) are deeper than the cabinet. You will have to determine if you want them at the same depth of the cabinet or flush with the door

GREEN indicates exposed side

YELLOW indicates side of face frame

CORNER CABINETS

- › We do not recommend using the Corner Wall cabinet (e.g. CW2430 and CBS36 _) due to the amount of face frame that is exposed
 - If you have to use the 27” deep Corner Wall cabinets, remember the exposed side and face frame edge
- › We recommend using the Wall Easy Reach and Base Super Susan or Base Easy Reach (e.g. WER30_ and BSS_, BER_, CAR_)

Picture shown with CW2742 with WEP1542 DT

MICROWAVE, DEEP SINK BASE AND OVEN CABINETS

- › Be aware of face frame exposure. Microwave, Deep Sink Base and Oven cabinets will have exposed face frame
 - Check the appliance size to be sure you are using a cabinet that will show the least amount of face frame
 - Picture shows a OVD3396 AS BUTT, a better option would have been a OVD3396 BUTT 1 DDWR

Picture shown with OVD3396 AS BUTT

BLIND CORNER CABINETS

- › When using a blind corner cabinet, you will want to use an Overlay DT filler to cover the exposed frame

Picture shown with no overlay on filler

Picture shown with overlay on filler

RETURNS AND FILLERS

- Dishwasher and Refrigerator Returns and Universal Fillers (e.g. DWR3, RR396 and UF's) are not textured
- › You must determine if you are designing to complement the box finish or the textured finish
 - If designing to match the textured finish, use the available DT end panels and overlay fillers to cover exposed frame and filler areas
 - › Textured S3S396 DT and S3S696 DT can be trimmed and edge banded with edge tape on the trimmed side

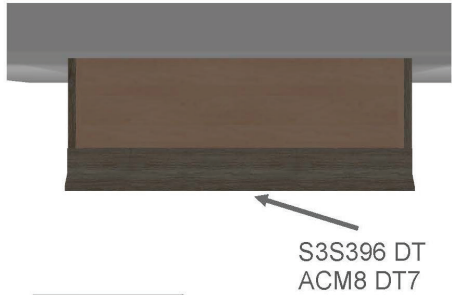

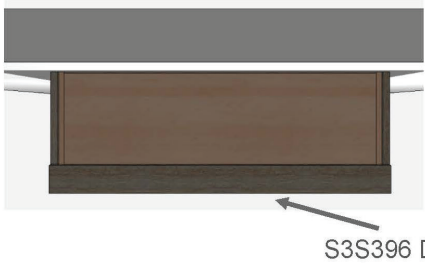

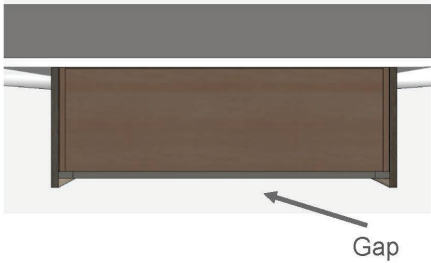

Picture shown with RR396 and S3S396

Picture shown with recommended overlay on DWR3

MOLDING

- › When using the WWP13_ DT ¾” End Panels at 13” deep or DWTEP_ DT at 25” Deep, you will need to remember there is a 1” gap
- › To fill the gap use S3S396 DT horizontal flush with the ¾” End Panel
- › The S3S396 DT horizontal molding can be used alone for a contemporary look or enhanced with additional molding such as ACM8 DT, SCVM8 DT OR LCVM8 DT
- › Moldings are not wrapped completely and cannot be flipped

MOLDING—FINISHED SIDES

- › Refer to Spec Guide call outs for finished sides of molding
- › Molding is not fully wrapped and cannot be flipped
 - i.e. CTM8 DT cannot be used in a vertical application, only laid flat

TOE KICK

- › Consider using recessed toe kick for all end run and exposed toe kick applications to avoid the horizontal grain butting up against the vertical end panel of the cabinet
